

It is the desire of those in charge of the departments to build up a mining and metallurgical museum somewhat after the nature of the exhibit by the U. S. Geological Survey that was on display in the Palace of Mines and Metallurgy at the San Francisco Exposition, entitled, Minerals and Their Uses. In the proposed collection will be shown the principal minerals and ores of Utah along with the product resulting from the commercial treatment of the same, together with the uses to which these minerals and products are applied. The series will make an attractive and highly educational display and will serve to stimulate the ambitious student and interested visitor to lend his efforts toward developing the mineral resources of the State of Utah.

News Happenings From Benson Ward

Benson, March 19.—The officers, teachers and pupils of our Sabbath School felt greatly favored in having President S. F. Ballif, Elder Louis S. Cardon and Elder John Quayle in attendance at Sabbath School last Sunday and again today to have Supt and Mrs. B. F. Hinckley, Secretary J. E. Hyde, Miss Myrtle Nebeker and Miss Diantha Hammond visit us and give us their valuable aid in promoting the welfare of our school.

Last Sunday afternoon our ward

conference was held and all the reports of the various organizations showed that all are doing a good work. President Ballif and Elders Cardon and Quayle each occupied a short time in talking on the value of the gospel teachings. Elders John Quayle and George Gardner occupied the time in a very interesting instructive way at our sacrament meetings today. In having so many of the stake authorities visit us we feel that we are not forgotten.

Since our last meeting an enthusiastic meeting of the Farmers Society of Equity has been held in Benson at which we were favored with the presence of Bishop A. L. Hyer of Lewiston, Mr. G. H. Hall of Star Valley and Mr. Roach of Box Elder county also Mr. Salisbury of Logan who is managing the farm there. The

advantages to be derived through this society were clearly and forceably set forth by the speakers. At the conclusion of the meeting several took stock and some who had stock before increased theirs thus giving evidence of faith in the work.

Several Benson farmers took a trip to Richmond on Black and White Day. Mr. A. J. Reese took up a load in his Buick car. He purchased a young Holstein sire from the Nelson Brothers. Mr. C. A. Reese bought two cows.

The roads are getting in good condition here now, so the owners of automobiles can make good use of them.

Mr. M. E. Rogers is now the owner of a Dodge car, but he has not yet brought it home. There are oth-

ers contemplating the purchase of automobiles.

You may think that Benson people are extravagant in their purchase of cars, but when you think of our long distance you will not blame us for wanting a quick method of travel. Again, the attractions of Logan are strong inducements to us to want to take a trip after the day's work is done. These pleasure trips with the good wife and children, help to make life on the farm more interesting.

Since our last letter Mrs. John Pitcher has presented her husband with a fine son; also Mrs. Samuel Christensen has presented her husband with a fine daughter. All concerned are doing well.

If this beautiful weather continues the farmers will soon be busy out-

ting in their crops. The splendid winter we have had with its copious supply of moisture means a prosperous year if nothing happens out of the ordinary to change conditions.

FOR THE LITTLE GIRL'S PARTY

For my little girl's party I made a candy fondant, covered it with oil paper to prevent the forming of a crust on top and let it cool over night. Pieces of the fondant were flavored as desired, then formed into dolls about three inches high. Pieces can be rolled for the arms, but legs are not necessary, as the dolls will stand just as well and are as pretty without.

Melt some chocolate and with a tiny brush paint the eyes, nose and hair. Use red colored fondant for

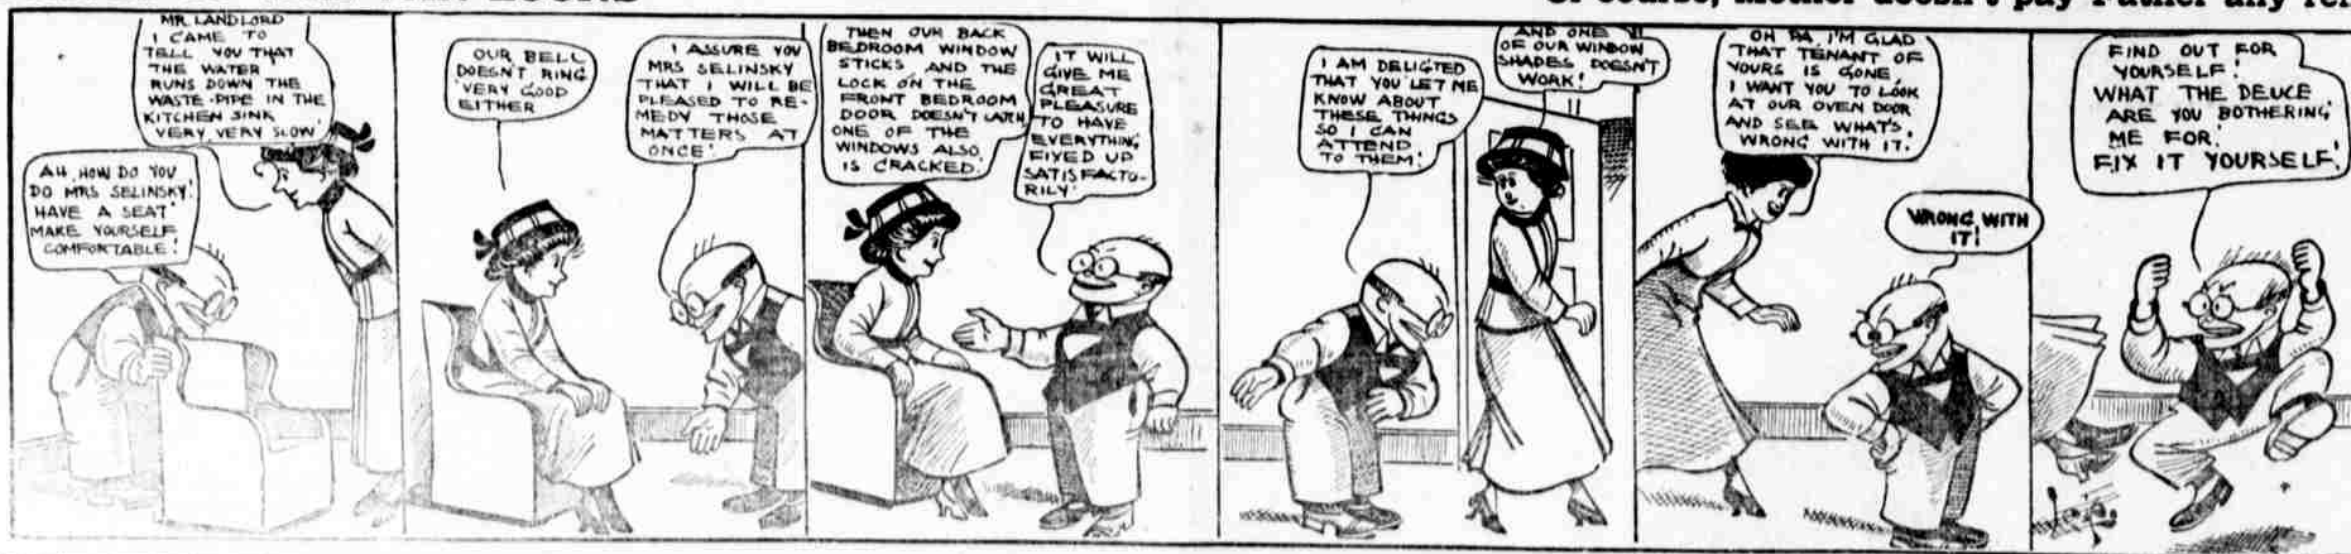

the mouth. Make white and pink dolls for the girls and chocolate colored dolls or brownies for the boys. Tie baby ribbon around the waist and finish with a little bow.

Stand a doll on a small lace paper doily at each child's plate.—Cleveland Plain Dealer.

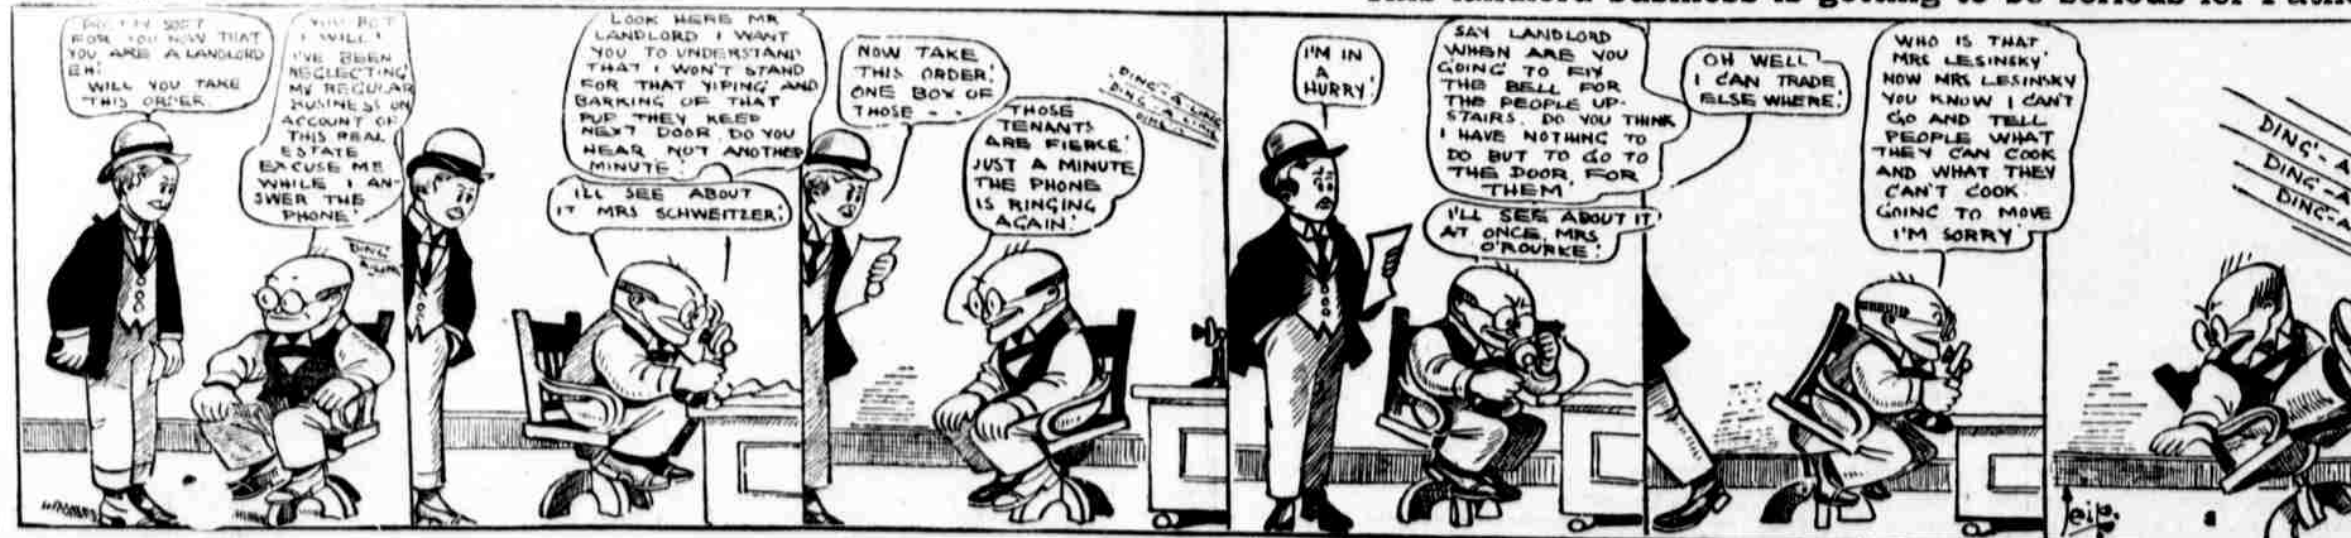

What Puzzles Office Holder.
It's always hard for a man holding office to realize that the place used to be run without help and that it's going to be again.

The Roof of the World

Copyright 1916
General Roofing
Manufacturing

*"From Greenland's icy mountains,
From India's coral strand,
Where Afric's sunny fountains
Roll down their golden sand,
From many an ancient river,
From many a palmy plain,
They call us to deliver
Their heads from sun and rain."*

You will find CERTAIN-TEED affording equal protection from the snow and ice of the Arctic, and the sun and rain of the Tropics. It is literally "the roof of the world".

Making roofing is the General's chief business. He makes one-third of all the roll roofing made in America—thirty-nine other manufacturers make the balance. Such predominance is due to the General's ability to make the highest quality roofing at the lowest cost.

Every advantage that men, money, mills and machinery can offer is used to increase production, maintain quality and lower the cost. The result is that today CERTAIN-TEED, the world's best quality, costs less than inferior roofing cost ten years ago.

CERTAIN-TEED is made of the best quality roofing felt, thoroughly saturated with a scientific blend of soft asphalts, the formula of the General's board of expert chemists. It is then coated with a blend of harder asphalts, which keeps the inner saturation soft and prevents the drying-out process so destructive to ordinary roofing.

CERTAIN-TEED is guaranteed for 5, 10 or 15 years, according to ply (1, 2 or 3). Experience proves that it lasts longer.

CERTAIN-TEED is made in rolls; also in slate-surfaced shingles. There is a type of CERTAIN-TEED for every kind of building, with flat or pitched roofs, from the largest sky-scraper to the smallest residence or out-building.

CERTAIN-TEED is sold by responsible dealers all over the world at reasonable prices. Investigate it before you decide on any type of roof.
